DAY -1

Hello coders! Welcome to this journey.

The first step in this journey is to install python on your own system. I will use visual studio for coding. So, at the beginning I am telling you how to install visual studio on your own system.

You can visit the link below to see the complete download & install procedure of visual studio & also download python according to your operating system.

Visual studio Link - https://docs.microsoft.com/en-us/visualstudio/python/installing-python-support-in-visual-studio?view=vs-2019

Python download link- https://www.python.org/downloads/

I hope you have successfully installed Python on your system. Then you are ready for the second day. Congratulations!!!
